EDUCATION

2022-2026
UMMA UNIVERSITY

- Bachelor of science in computer science

SKILLS

- Programming Languages : Java, Python, javascript, typescript
- Web & Mobile Development: React.js, Node.js, Flutter, Android (Kotlin), HTML, CSS
- Databases: Firebase Realtime Database, Mongo DB, Supabase
- Blockchain Systems: Smart Contracts (Solidity), Truffle, Web3.js
- Tools & Productivity: Git, Slack,Postman,Docker
- Core Competencies: Problem-Solving, Team Collaboration, Agile Development

LANGUAGES

- English (Fluent)
- French (Conversational)

PROFILE

Innovative Software Engineer with extensive experience in web, mobile, and blockchain development. Proficient in database management and full-stack development, with a demonstrated ability to swiftly learn and adapt to emerging technologies. Experienced in Agile environments through university tech hubs, industry placements, and freelance projects. Passionate about creating scalable, practical solutions that empower innovation through technology.

PROFESSIONAL EXPERIENCE

IT Attachment | National Cereals and Produce Board (NCPB) — JAN 2025 - APR 2025

On-Site

- Developed and delivered a prototype Helpdesk System to streamline internal IT support requests.
- Assisted IT team in troubleshooting hardware, software, and network issues.
- Gained hands-on experience in system development, testing, and IT support operations.

Student Developer | Umma University Tech Hub — 2022 - PRESENT

On-Site

- Designed and deployed 3+ web and mobile applications, improving usability and reducing development time by 20%.
- Collaborated with peers to build, test, and deploy real-world solutions using modern frameworks and cloud platforms.
- Enhanced problem-solving and teamwork skills through Agile project cycles and peer programming.

PROJECTS

Kenya Housing Blockchain System

- Built a decentralized platform enabling transparent property ownership transfer using blockchain smart contracts.
- Automated ownership transfer upon purchase, ensuring tamper-proof records and eliminating manual middlemen.

  Tech Stack: Solidity,Truffle, Web3.js, Css, Html

  https://github.com/NgatiaEdison/BLOCKHOUSE_KE

Umma University Visitors Management System

- Developed and deployed a live digital security platform for Umma University to transition from manual visitor logging to a digitized, real-time database

  Tech Stack: React Native, Firebase, Expo, Typescript
